DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Case et al (US. Pat. No. 4,964,427).

Case et al discloses a low sidestream cigarette which comprises a cigarette paper comprising one or more burn retardants, which can include calcium phosphate and other agents up to 20-30% by weight of the paper. Therefore, the cigarette paper of Case et al could comprise 10% calcium phosphate and 10% of another burn control agent. Further, as shown in the specification, and specifically in Table 2, the cigarette paper may have a basis weight of up to 50 gram/square meter (corresponding to the claimed "40 grams/square meter or more and 70 grams/square meter or less). So, for a cigarette paper having a basis weight of 50 grams/square meter, the basis weight of the calcium phosphate compound and the burn control agent, at 10% loading weight each, would each be 5 grams/square meter (corresponding to the claimed basis weights) (see col. 2, lines 42- col. 3, line 2; col. 5, line 44; see table 2).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Case et al (US. Pat. No. 4,964,427).

While Case et al may not specifically mention a citrate salt as one of the burn retardants that can be used in its cigarette paper, it doesn't require that just the agents listed are the only ones envisioned by the inventor to be used, as it lists the named agents as "among the substances which can be used" . Further, organic acid salts are well-known in the tobacco art for their use as burn retardants. Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention to provide the wrapper of Case et al with a burn retardant comprising an organic acid salt in order to appreciate the burn control benefits of such substances.

Allowable Subject Matter

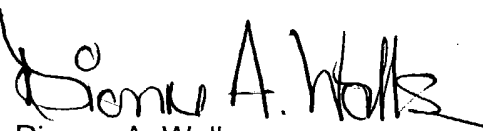

5. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
